

## Press release Calendar Week 10/I

### Safe tours with your bike

#### Rameder presents new carrier systems right before the Easter holidays

Easter is nigh, and those holidays may well provide for the time for a short holiday. Perhaps including a cycling tour? Well, then just do it. **Rameder**, Europe's largest provider of transport accessories for cars, has some interesting new bike carriers on offer. Check out its extensive range at [www.rameder.eu](http://www.rameder.eu).

The stable **Hapro Atlas 2 Premium** (Euro 329), for example, with its payload of 60kg it can carry two bikes (also e-bikes). Thanks to a payload of 65kg and the right rails, the **Atlas 3 Premium** (Euro 349) can even carry three. The integrated locks of the **Hapro** carriers also protect against theft.

**Rameder's** lightweight rear solutions are the **Ufo 2+** and **UFO 2+1** systems. A low weight at a high payload make for best transportation. 60kg payload for two bikes or e-bikes provides the **Ufo 2+** (Euro 519,01). And three bikes are carried by the **UFO 2+1** (up to 70kg payload; Euro 629). Both have a 13-pin plug.

An alternative to rear carriers is the **Hapro Giro** roof rack (Euro 89). It will carry a bike of up to 17kg and can be mounted on the base rack with no extra tools being required. Thanks to the quick-release system, neither any pre-assembly nor pre-adjustments are necessary. Two always integrated locks provide anti-theft protection for both bikes and rack.
